RE: Remedial Investigation/Feasibility Study (RI/FS) Reports for
Standard Chlorine

Dear Mr. Henne:

Enclosed are two copies of the Final RI and Draft FS for the
Standard Chlorine Site, located in New Castle, Delaware. The
site is currently scheduled for a Record of Decision (ROD) in
September of 93.

A Bioremediation Treatability Study is currently underway.
They anticipate that the treatability study will be completed in
March of 93.

The enclosed documents should provide sufficient information
for DOI to become familiar with site and initiate the Preliminary
Natural Resource Survey (PNRS). I would appreciate it if someone
from your office would contact me after their review to discuss
the PNRS and the process to ensure that we can coordinate the
necessary activities in time for the ROD. If possible, I would
like the opportunity to review the Draft PNRS.

If you have any questions or comments on the enclosed
material, I can be reached at (215) 597-0910.

Sincerely,

Katherine A. Lose
Remedial Project Manager
